

Mounjaro (Tirzepatide) Consultation and Treatment Record

This form supports, but does not replace, an individual assessment and valid prescription by an appropriately qualified prescriber. Complete a fresh administration/supply record for each clinic-provided dose.

1. Client and practitioner details

Full name	Date of birth
Contact number	Email address
Address	
Emergency contact	Emergency contact number
GP name and address	
Practitioner name	Consultation date

2. Treatment goals and baseline assessment

Height (cm)	Baseline weight (kg)
Baseline BMI (kg/m ²)	Waist circumference (cm)
Licensed treatment indication and eligibility rationale	
Weight-related conditions and relevant clinical measurements	

Goals, expectations, previous approaches and agreed diet/activity support

3. Medical history and medicine review

Answer every question. Record details, dates, diagnoses, medicine names and investigation results below.

Allergy or previous hypersensitivity to tirzepatide or a Mounjaro ingredient?	Yes []	No []
Pregnant, trying to conceive or breastfeeding?	Yes []	No []
Able to become pregnant?	Yes []	No []
Using oral contraception?	Yes []	No []
Previous or current GLP-1/GIP medicine?	Yes []	No []
Diabetes or abnormal blood glucose?	Yes []	No []
Using insulin, a sulfonylurea or another diabetes medicine?	Yes []	No []
Previous pancreatitis or pancreatic disease?	Yes []	No []
Current severe persistent abdominal pain, especially radiating to the back, with or without nausea/vomiting?	Yes []	No []
Gallstones, gallbladder disease or previous gallbladder surgery?	Yes []	No []
Severe gastrointestinal disease, including severe gastroparesis?	Yes []	No []
Kidney disease, impaired renal function or dehydration risk?	Yes []	No []
Liver disease?	Yes []	No []
Current or previous eating disorder, disordered eating or significant nutritional concern?	Yes []	No []
Mental-health condition, suicidal thoughts, self-harm risk or medicine misuse concern requiring assessment?	Yes []	No []
Planned surgery, sedation, procedure or general anaesthetic?	Yes []	No []
Any other prescribed, non-prescription or herbal medicines?	Yes []	No []

Details of every Yes answer, allergies, current medicines and relevant investigations

Contraception discussion, additional protection and one-month washout plan

Previous GLP-1/GIP medicine, dose, last dose, response and adverse effects

Diabetes medicines, glucose/HbA1c information and hypoglycaemia monitoring/dose-adjustment plan

4. Suitability and prescribing decision

Outcome: Suitable / Defer or restrict / Medical referral required / Not suitable

Clinical reasoning, restrictions, referrals and alternative options

Prescriber name, professional registration and prescription reference

Planned starting/current dose

Dose frequency

Titration plan, review criteria and stopping criteria

5. Counselling and informed consent

☐ Licensed indication, alternatives, expected benefits, limitations and the role of diet and physical activity have been discussed.

☐ Common gastrointestinal effects, injection-site reactions, dehydration risk and practical management have been discussed.

☐ Pancreatitis warning symptoms and the need to stop treatment and seek urgent medical help have been discussed.

☐ Hypoglycaemia risk and monitoring have been discussed where insulin or sulfonylureas are used.

☐ Pregnancy, breastfeeding, contraception and tirzepatide washout advice have been discussed where relevant.

☐ The client will tell surgical and anaesthetic teams that they use tirzepatide before a procedure.

☐ Storage, KwikPen use, weekly dosing, missed-dose instructions, site rotation and sharps disposal have been explained.

☐ Questions have been answered, sufficient decision time was provided, and the client consents to the agreed plan.

Client signature

Date and time

Practitioner/prescriber signature	Date and time

6. Administration or supply record

Complete for every dose administered or supplied by the clinic. Create an additional record for each later dose.

Administration/supply date and time	Dose administered or supplied

Pen strength and presentation	Batch / lot number

Expiry date	Route, injection site and site rotation

Administered by client/practitioner	Practitioner name, if applicable

☐ Identity, valid prescription, dose, product integrity, storage and expiry checks completed.

Current weight (kg)	Current BMI (kg/m2)

Response, adherence, side effects, hydration/nutrition and relevant observations

Adverse events, action, escalation and Yellow Card advice (enter None if none)

Next dose, review date and monitoring plan

Recorded by	Record date and time

7. Important safety information and sources

Seek urgent medical assessment for severe, persistent abdominal pain that may radiate to the back, with or without nausea and vomiting. Pregnancy, trying to conceive and breastfeeding require prompt prescriber review. This record must be used with the current Mounjaro Summary of Product Characteristics, patient leaflet, the clinic's prescribing protocol and professional scope-of-practice requirements.
