Pre-procedure consent and procedure information

The skin peeling procedure is a medium depth peel. During the procedure you may experience a tingling, prickly or stinging sensation and your skin may turn red. Redness will occur for up to 10 days after the procedure. You will experience the skin peeling, please DO NOT pick the excess skin as it can cause infection. Please use sterile scissors if there is any skin hanging. Apply the aftercare you have been given by your advanced aesthetic practitioner.

Immediately afterwards you will feel that you're skin may feel tight, dry, and sensitive. You will also experience erythema (redness) you may also experience some mild breakouts depending on your skin type. You must follow all home care advice provided. It is important to adhere to the 2-week protocol skincare regime and follow all homework which has been instructed by your practitioner to avoid any contra-actions.

Post-Procedure Products Used:	Area Post procedure Products applied:	Skin reaction to procedure:	Post procedure photograph taken: Yes/No

Post-procedure instructions

To achieve the best results possible, it is important that you read and understand the following instructions. Your advanced aesthetic practitioner will discuss the required post-procedure protocols with you following the procedure; these instructions must be adhered to as advised by your advanced aesthetic practitioner.

1. Your advanced aesthetic practitioner will advise you of the expected procedure recovery time and skin response.
2. Immediately following the procedure, it is essential that you apply a broad-spectrum physical sunscreen (minimum SPF30). This must be reapplied at 2-hour intervals throughout the day to ensure maximum protection.
3. Avoid direct sun exposure for 5-10 days following the procedure. Direct sun exposure can lead to hyper-pigmentation.
4. Avoid strenuous exercise for 24 hours to prevent overheating/increased blood circulation.
5. Avoid saunas, steam rooms etc. as excess heat can lead to discomfort, inflammation, irritation etc.
6. Increase water intake to at least 8 glasses per day.
7. Your skin may begin to peel following the procedure – **DO NOT PICK OR PEEL LOOSE SKIN**. Trim with sterile scissors.
8. Avoid the use of exfoliating products for at least 5 days and avoid waxing/hair removal in the procedure area for 14 days.
9. Avoid the use of flannels and/or sponges to apply cleansing products. Use post-procedure products as instructed by your advanced aesthetic practitioner.
10. Your advanced aesthetic practitioner will advise you of ongoing procedure recommendations and suitable treatments which may be used in conjunction with skin peeling/micro needling procedure.

I accept the results of the procedure performed today and I understand and agree to adhere to the above instructions. I agree to contact my advanced aesthetic practitioner with any additional questions I may have. I hereby indemnify the learner against any adverse reaction sustained because of the procedure.
